AIRIUS Q SERIES THERMAL EQUALISER SOUND POWER LEVEL COMPARISONS

We are pleased to advise that we have reviewed the acoustical data for Airius Q Series Thermal Equaliser Models Q-50-EC-STD-100-130W and Q-50-P4-STD-120W.

1.0 AIRIUS FANS Q-50-P4, Q-50-EC

The Airius fans circulate air to evenly distribute air throughout a large space. The fans are designed to hang from the ceiling and distribute air from heights as follows:

- Q-50-EC – 5 to 16 metres
- Q-50-P4 – 5 to 16 metres

Tested noise data for the Airius Q-50 Thermal Equalisers have been provided by the manufacturer. The datasheets for the two fans are attached as Appendix A. The calculated sound power levels from linear third octave band sound pressure levels are tabulated as follows:

Table 1 Airius Fans

Fan	RPM	Sound Power Level (dBA)	Airflow L/s
Q-50-EC	413	36	-
Q-50-EC	825	55	-
Q-50-EC	1238	68	-
Q-50-EC	1650	73	637
Q-50-P4	800	57	-
Q-50-P4	1065	62	-
Q-50-P4	1420	70	500

• AIRCRAFT, ROAD TRAFFIC AND TRAIN NOISE CONTROL
• ARCHITECTURAL ACOUSTICS • INDUSTRIAL NOISE AND VIBRATION CONTROL
• ENVIRONMENTAL NOISE IMPACT INVESTIGATION AND CONTROL
• OCCUPATIONAL NOISE INVESTIGATION • QUIET PRODUCT DEVELOPMENT

SOUND POWER LEVEL COMPARISONS**2.0 AUSTRALIAN STANDARD AS2107:2016****2.1 Recommended Internal Noise Levels**

Australian Standard AS 2107:2016 *Recommended design sound levels and reverberation times for building interiors* recommend the following internal noise levels for theatres and museums:

Table 2 Recommended Internal Noise Levels

Type of occupancy/activity	Recommended design sound level, L_{Aeq} , dB(A)	
	Satisfactory	Maximum
Public Buildings-		
Art galleries	40	45
Auditoria		
Cabarets and theatre restaurants	35	40
Concert and recital halls	30	35
Drama theatres	25	30
Exhibition areas	40	50
Museums (exhibition spaces)	40	45
Theatres for operetta and musical plays	35	40

SOUND POWER LEVEL COMPARISONS**2.2 Sound Pressure Levels of Fans – Acoustically Live Room**

Given the sound power levels in Table 1 above, the following sound pressure levels are calculated at distances outlined in Table 3 below.

The following calculated noise levels are for a 2000 m³ room volume with typically hard surface finishes and no soft furnishings to create an acoustically live room.

Table 3 Sound Pressure Level of Fans – Acoustically Live Room

Fan	Sound Pressure Level from Discharge (dBA)			
	5 metres	8 metres	10 metres	16 metres
Q-50-EC				
413 RPM	25	24	24	24
825 RPM	44	43	43	43
1238 RPM	57	56	56	56
1650 RPM	62	61	61	61
Q-50-P4				
800 RPM	46	45	45	45
1065 RPM	51	50	50	50
1420 RPM	59	58	58	58

The above calculated sound pressure levels appear to be suitable for use in museums (40 – 45 dBA) and theatres (35 – 40 dBA) for speeds of 800 RPM or less, when compared against the recommended internal noise levels outlined in Australian Standard AS2107:2016, provided a suitable distance from the fan is maintained.

We recommend that the installation of the fans be assessed on a case by case basis as the acoustic environment and installation may change depending on the use of the space.

SOUND POWER LEVEL COMPARISONS**2.3 Sound Pressure Levels of Fans – Acoustically Dead Room**

Given the sound power levels in Table 1 above, the following sound pressure levels are calculated at distances outlined in Table 4 below.

The following calculated noise levels are for a 2000 m³ room volume with typically carpet flooring and plenty of soft furnishings to create an acoustically dead room.

Table 4 Sound Pressure Level of Fans – Acoustically Dead Room

Fan	Sound Pressure Level from Discharge (dBA)			
	5 metres	8 metres	10 metres	16 metres
Q-50-EC				
413 RPM	19	17	15	14
825 RPM	38	36	34	33
1238 RPM	51	49	47	46
1650 RPM	56	54	52	51
Q-50-P4				
800 RPM	40	38	36	35
1065 RPM	45	43	41	40
1420 RPM	53	51	49	48

The above calculated sound pressure levels appear to be suitable for use in museums (40 – 45 dBA) and theatres (35 – 40 dBA) for speeds of 800 RPM or less, when compared against the recommended internal noise levels outlined in Australian Standard AS2107:2016, provided a suitable distance from the fan is maintained.

We recommend that the installation of the fans be assessed on a case by case basis as the acoustic environment and installation may change depending on the use of the space.

SOUND POWER LEVEL COMPARISONS**3.0 CONCLUSION**

Day Design was engaged to assess the sound power levels of the Q-50 fans from Airius.

The sound pressure levels of the Q-50 Airius fans have been determined at various distances for comparison against Australian Standard 2107:2016 *Recommended design sound levels and reverberation times for building interiors* to determine suitability.

We recommend that the installation of the fans be assessed on a case by case basis as the acoustic environment may change depending on the use of the space.

William Wang, BE (Mechatronics), MIEAust, MAAS
Senior Acoustical Engineer
for and on behalf of Day Design Pty Ltd

AAAC MEMBERSHIP

Day Design Pty Ltd is a member company of the Association of Australian Acoustical Consultants, and the work herein reported has been performed in accordance with the terms of membership.

The undersigned hereby certifies that this Report has been checked and approved in accordance with our Quality Management System.

- Appendix B – Airius Test Data – Q-50-EC
- Appendix C – Airius Test Data – Q-50-P4

MODEL Q50 DIMENSIONS

MODEL Q50 PROPERTIES

UNIT SIZE	Standard	
	Weight:	7.45 kgs
	Height to Rim:	435 mm
	Total Height:	550 mm
	Diameter:	364 mm

MOTOR	230V	
	Watts* (MAX) @ 50 htz:	110
	RPM* (MAX) @ 50 htz:	1710
	L/S* @ 50 htz (m3/hr):	637 (2,294)
	AMPS* @ 50 htz:	.07

*Motor data provided by motor manufacturer and is subject to change at anytime

COVERAGE

- Floor area = 115m²
- Diameter = 12m
- Ceiling Height = 15m

MOTOR

- Single Phase
- 1710 RPM @ 50hz
- EC - Electricity Commutated, 92% efficient motor
- All model Q50 EC motors are sourced from EBM PAPST

OPERATING TEMPERATURES

- Min start temp (approx.) = - 25° C
- Maximum ambient temp = 60° C
- Ambient temperature maximum = 60° C
- Overtemperature protected electronics/motor

NOISE LEVELS

- Sound Power Level 71 dB (A)
- Sound Pressure Level @ 8 mts = 43 dB
- Sound Pressure Level @ 12 mts = 41 dB

Please contact Airius for full Noise Testing Report

INGRESS PROTECTION

- Rated IP44

COLOUR

- Off white as standard
- Can be tailor painted to your colour specifications

ACCESSORIES & OPTIONS

- Airius speed control - Potentiometer to alter 0-10VDC control (EC)
- Building management systems can vary speed of EC based on a 0-10VDC

WARRANTY

- 5 years full manufacturers replacement from date of despatch. Subsequent 5 year 'half new price' rebuild cover

STANDARDS

Product conforming to standards:
EN 60335-1, EN 61800-5-1, EN 60950-1, CE

MODEL Q50 PLACEMENT

PREPARATION

- Install electrical circuit(s) and outlet(s) in accordance with national and local electric codes
- Outlets should generally be mounted vertically unless a "twist/locking" type is being used
- Wall switch may be installed in circuit to disable power and prevent electrical hazards when servicing
- Confirm electrical continuity of Airius unit on the ground before permanently mounting in the ceiling

INSTALLATION

- Hang vertically as high in the ceiling as possible
Typically 300 – 450 mm from the roof deck to intake
- The Airius unit performs best when air column from the nozzle is unimpeded to the floor
- Use professionally installed hardware, capable of supporting a minimum of five times the weight
- Hardware to hang the unit includes but is not restricted to: Hooks, chains, cables, carabiners, bridle rings, beam clamps and bolts
- Density of the placement is directly related to the effectiveness, performance and savings
- Mount out of reach from people and animals
- Floor plans, mezzanines, office locations, machinery, people placement, plumbing, lighting, duct work, electrical systems, natural light/air systems, cranes, doors, windows, ventilation and fire suppression systems are all factors in properly locating the Airius system within the ceiling

NOTE:- Air Pears must not be installed directly to structure if they are to be angled. In this case a small length of cable or wire must be used between the handle and the structure to reduce compound twisting torque on the handle.

OPERATION

- Designed to operate 24 hours-a-day, 7 days-a-week to maintain thermal equalization/humidity equalization
- Use optional speed control to fine tune RPM if needed

MAINTENANCE

- Frequency of cleaning will vary by application and environment
- You may clean the plastic housing with a damp warm cloth, using mild household detergents
- Do not use petroleum products, thinners or solvents to clean any part of the Airius unit
- If the Airius unit fails, contact manufacturer

MATERIALS & PROPERTIES

- Constructed from recyclable materials
- The outer shell, stator and fan blades are fire rated 5VA materials
- Power cord is a 3 wire 1.02 mm diameter 300VAC rated electrical cord - CE/EU compliance rated as HO5VV
- Motor is thermally protected. Shutoff is at 135°C & reset is at 125°C
- 71dB (A) Sound Power Level
- No lubrication required. Bearings are sealed
