Pearlink Hardware Configuration

White = Switch Position

EC-MOD Fans

Con		Fan
No Con		**Floor**

Model Pearl EC, 25 EC ,R20 EC and R20 EC Narrow Aisle.

All Other EC Fans

Con		Fan
No Con		**Floor**

Model Onyx EC, 45 EC, Q50 EC, 60 EC, G400 EC and Diamond 560 EC.

## Floor Sensors
Con		Fan
No Con		**Floor**

Note these larger fans need to have the extra **12 volt DC** power transformer fitted to each Wi-Fi module as detailed (PSU).

Note:- this is where the power transformer fits as the floor sensor needs a power source.

PearLink Reset Instructions

1) Unplug fan to shut off power.

2) Remove the PearLink enclosure by sliding it upward. It will still be connected to the fan wiring.

3) Remove the two screws on the back of the enclosure to expose the circuit board.

4) Use a paper clip, or other conductive material to bridge the two pads circled below.
5) While the bridge is still intact, power the fan.

6) Wait 10 seconds.

7) Unplug the fan and remove the bridge.

8) The device is now ready to be re-provisioned through the app.
