

## CASE STUDY

# SWEET CHARLOTTE STUDIO

IN SUNSHINE COAST, QLD

## INTRODUCTION

Sweet Charlotte Studio is a women's fashion distribution business owned by Rugby League legend, Kerrod Walters, and his wife, Desley.

Based on the Sunshine Coast, the brand boasts two boutique retail spaces and a large distribution warehouse.

Due to the size, associated costs and difficulty with installing air conditioning in our warehouse, we thought installing Airius units it would be our best option.

### KERROD WALTERS

AUSTRALIAN RUGBY LEAGUE LEGEND  
CO-OWNER, SWEET CHARLOTTE STUDIO

## THE CHALLENGE

The size of the warehouse space meant installing air-conditioning was challenging, and expensive both in terms of installation costs and long-term operating costs.

Sweet Charlotte Studio sought an efficient and cost-effective solution to increase airflow inside the warehouse and improve thermal comfort for their staff.

## THE SOLUTION

Four Onyx EC units were installed in the large warehouse, with controls to provide air movement cooling, establishing a more comfortable workspace for the team.

*"We have created a cooler environment for our staff."* – Kerrod Walters

### Product: Onyx Series

Use Case: Air movement cooling

Range: Heights of 4-12 metres
